

## Early Years

The children have had another super week in school and have been fantastic during their first week of full days.

This week we put on our wellies and had a lovely autumn walk around the school grounds looking for signs of autumn. Our first PE lesson was super exciting, we went into the big hall and played some great games, we cannot wait until next week's lesson! We have also been learning some sign language this week; we can now say hello, good morning, good afternoon, boy and girl. The children were superstars and used the new signs they had learnt in their play.

Well done everybody for another fantastic week!

## Years 1 & 2

In Year 1 this week we have been focusing on how to write simple sentences. We have been using our sentence checkers to help us remember those all-important essentials; capital letters, finger spaces, full stops and re-reading to check it makes sense. Another smashing week Year 1s- well done!

This week in Year 2 we have been amazing scientists continuing our materials work. We wanted to find out what the best material would be to make a treasure chest and so conducted an experiment to test how waterproof a material was. We loved putting on our science goggles and lab coats! In PE this week we had a bit of an aiming competition and each team tried to collect the most points. One team managed to get 206 points!!

## Years 3 & 4

This week in Year 3 we have built on our drawing skills. We have looked at texture and tone and the effects we can create by using them. First we practised using a tone bar and then used what we had discovered to shade an eye. Next week we will be using what we have learnt to create a dragon eye drawing.

We experienced a very unusual start to the week in Year 4! We were left a mysterious letter which told us of a very important book. We have been sworn to secrecy about the book and its contents....but let's just say it has been used to inspire some amazing literacy work!

In Science the children loved collecting 'samples' from our forest school area and we had a super time drawing and classifying the invertebrates.

## Years 5 & 6

This week in Year 5, we compared the ancient Greek Olympics to modern day. We explored the range of sporting events and how these have developed over time, to now include more than 50 sports! Choosing our favourite ancient Olympic sport, we created a still frame of what this would have looked like. Can you guess which sport we are showing?

Year 6s have had another busy and fun week and have enjoyed earning lots of the new team points! In science, we learned about plants' adaptations to living in rainforest conditions and our rainforest reports are now complete! In maths, we have worked hard to learn and practise formal methods of multiplication. We had an enjoyable afternoon with clay making clay leaves and animal sculptures and our Mayan dances are looking fantastic!
