

## Early Years

What another fantastic week we have had in Early Years!

This week the children have learnt sign language for the colours of the rainbow and they will be using them in the next couple of week to put together a special surprise for the grown-ups. We were super observant down in forest school where we had colour grids and had to find different items that matched our grid. We had a super exciting PE lesson where we changed into our PE kit for the first time! It was lots of fun and nobody lost any items of clothing.

Well done everybody!

## Years 1 & 2

We have really enjoyed playing with our new outdoor playtime equipment this week, our throwing and catching skills which we've been learning in PE are coming in use when playing with it! We have been using our sense of smell this week by trying to work out which smell was in our 'curiosity cube' in the classroom. If you guessed lavender and mint you were using your amazing sense of smell very well!

This week in Year Two we have been learning all about nouns, adjectives and verbs and have been using these in sentences about pirate objects. We have been adding on in tens from any number in maths and are all amazing at this now! In music we became film composers and had a go at choosing instruments and creating sounds to show different moods and weathers.

## Years 3 & 4

This week Year 3 have used all of their work on vocabulary from the past five weeks to help them write an exciting adventure story. The stories built up lots of suspense and Tomas was in great danger on his adventures with the dragon, but luckily they managed to escape the many problems the children had come up with!

In Year 4 we have been super busy adding the finishing touches to our 'Lost Happy Endings' paintings. We used water colours, finger painting and even cocktail sticks to achieve the effect we needed for the tree and sky. Finally, we added our own 'Jub' complete with a fabric, magic sack. Thank you to Mrs Rayner and Mrs Hields for helping us with this fabulous work. Our teachers are very proud of how fantastic they all look.

## Years 5 & 6

We have continued our exploration of Ancient Greek pottery by painting the pinch pots we made last week. We used the ends of the paintbrushes to concentrate on the detailed geometric designs that the Greeks used in their pottery. We have also been having a wonderful time with writing our own 'How to care for your minotaur' leaflets which we hope to publish next week!

This week, Year 6 have worked incredibly hard to learn a new method in Maths - long division! Demonstrating perseverance and resilience, they have earned plenty of team points for their efforts. In PE, the children have been perfecting their tribal dance routines, working on their timing and synchronicity. Another fantastic week Year 6!
