

Early Years

We have had a fanastically festive week in Early Years. Our Elf workshop has proved very popular with children creating Christmas crafts, wrapping gifts and writing cards and labels, all whilst sporting santa and elf hats – brilliant! The children had an amazing time watching the performance of The Frog Prince and are looking forward to seeing the special live-streamed version of the much-loved stage adaptation of The Gruffalo which will be broadcast live from London to audiences around the world on Friday! We have also been using our imagination with our winter small world resources, creating super games, patterns and stories.

Years 1 & 2

In Year 2, we came dressed up on Monday and we flew back in time to 2nd September 1666 - the costumes were brilliant, well done to all! On our Great Fire of London day we made our own Tudor houses using recycled cardboard boxes, we acted out the events of the fire and we made our own bread but do not worry we remembered to turn the oven off!!

This week has been great fun in Year 2 with our movie morning, space lander task and live screening of the Gruffalo play! In literacy we have been retelling a space story using adjectives and conjunctions to make our sentences amazing. We have been looking at work from artists Kandinsky and Kate Semple and have combined some of their techniques to make an amazing piece of art. We can't wait to show you!

Years 3 & 4

This week in Year 3 we had a day of investigations and experiments. We tested the durability, permeability and density of different types of rock and looked at soil types, discussing the similarities and differences between them. We put our knowledge to the test at the end of the day with a fun quiz!

We also perfected the dance we have been learning this half term and performed it one final time - this will be put on google classrooms for you to see; we hope you enjoy it!

Years 5 & 6

This week in Year 5 we have been investigating reversible and irreversible changes in science. We had great fun watching what happens when bicarbonate of soda is mixed with vinegar and thoroughly enjoyed making our own plastic from warm milk and vinegar. We noticed an instant chemical reaction between the milk and vinegar, as tiny solids were formed. We separated the solids from the liquid using our hands and formed this into our plastic shape.

We braved the bracing temperatures this week to apply our mapping skills to some geography field work. In English, we've had lots of fun this week writing an application letter to Santa Claus, outlining all of the reasons why we should be considered for the position of a Christmas spy! We were also treated to a special performance from Mr Threadgold of 'The Reluctant Dragon'.
